

Read and follow these safety instructions first

## 1. Safety instructions

- 1.1 Installation, mounting (fix into hoses), putting into operation, maintenance, removal and repair may carried out by qualified experienced specialists with knowledge in pressurized piping construction only.
- 1.2 The statutory and other applicable regulations and standards have to be noticed and kept.
- 1.3 The pressure of maximum 10 bar, temperature of maximum +120 °C, the instructions of the
  - > EU-Declaration of conformity EUKE-DG-K100
  - and – if a limit switch is mounted – the instructions of the
    - > Appliance information KE-GI-... resp. the technical datas of the KE-TD-..
have to be noticed and kept.
- 1.4 Putting into operation and pressure admission only
  - after correct building-in of the hose coupling into the delivery hose
  - after correct mounting of the coupling with thread at the tube (threaded connection) and if need by fixation with the locating screw
  - with closed coupling connection
- !!! Before pressurize the tubing make sure that the couplings are correct inserted resp. connected and
  - with Storz-couplings
    - is pulled to the limit stop
  - with couplings according to DIN 28 450
    - the clamping ring is tightened firmly and the safety lever is folded down
  - with KAMLOK – couplings
    - both levers are turned down to the coupling
- 1.5 **Disconnect resp. open the coupling connection only when pressure-free.**

### ATTENTION ! Danger of injuries

- If loosened and opened in pressurized condition the blank coupling, blank cap resp. closing cover or closing plug will accelerate like a bullet and may cause serious injuries and damages.
- If loosened in pressurized condition the hose will lay about one and may cause serious injuries.

- !!! Before loosen resp. open the coupling connection make sure that the tubing is pressure-free.

Depending on over pressure and hose diameter place suitable warning information.  
e.g. **"Loosen only in pressure-free condition"**

- 1.6 If one of the coupling elements is damaged the pressurizing has to be shut off immediately and the tubing resp. hose line is to relieve from any pressure.
  - 1.7 Elements of the coupling should be removed or demounted only in pressure-free condition.
- !!! For couplings with build-in limit switch take also notice of the safety instructions on the back.

Read and follow these special conditions and safety instructions

## 2. General safety instructions

- 2.1 The installation, maintenance, initial operation, removal and repair have to be controlled resp. checked by an "authorized person" for explosion protection.
- 2.2 Comply with the requirements of DIN EN 60079-14, DIN EN 60079-17 and DIN EN 1127-1, especially regarding the dust deposits and temperatures and follow the pertinent rules and regulations.

## 3. Safety Instructions Gas+Dust Ex and hybrid mixtures for the application of couplings in explosive hazardous areas.

- 3.1 The couplings are allowed to be mounted on tubing
  - when the internal is classified as zone 0 or zone 20 resp. zone 0+20 (hybrid mixtures) or lower
  - when the external area is classified as zone 1 or zone 21 resp. zone 1+21 (hybrid mixtures) or lower
- !!! By attached electrical devices – e.g. limit switches or RFID – systems to recognize the connection – the couplings has to be mounted in the external area just in that zone the electrical devices are classified for.
- 3.2 The coupling has to be constantly conductive connected to the electrically conductive, earthed tubing.  
- If the tubing is not electrically conductive the coupling has to be earthed.
- 3.3 If combustible gases and vapours or combustible dusts with a minimum ignition energy under 3 mJ or a minimum ignition temperature under +300 °C (BAM assessment) were carried inside the coupling resp. by an appliance within zone 0 and/or zone 20 only the stainless steel variants of the product touching parts are permissible.

## 4. Safety Instructions for the application of limit switches in explosive hazardous areas.

- 4.1 Comply with the electrical connection take notice of the local and statutory rules and regulations and/or the VDE 0100.
- 4.2 Before electrical connection, compare the supply voltage with the details at the data plate.

### for the version KE and KI Option B0 Dust Ex

- 4.3 The limit switches can be used in areas classified as zone 22.
- 4.4 A fuse (with max. 4 A) has to be connected in series to the supply voltage.
- 4.5 Protect the signal contacts of the limit switch KE against voltage peaks when inductive loads are connected.

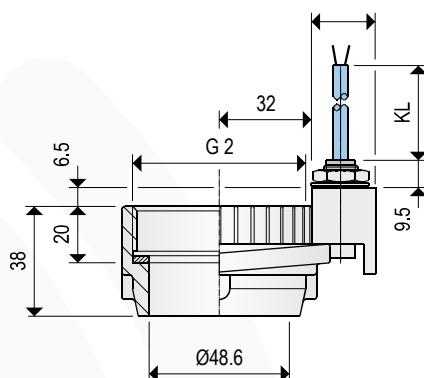

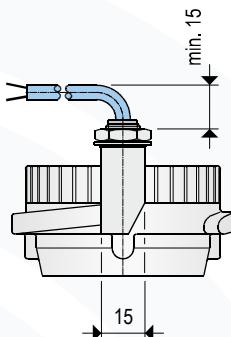

### for the version KN Gas+Dust Ex

- 4.6 The limit switches can be used in areas classified as zone 1 and zone 20 or lower.
- 4.7 To keep the intrinsically reliability a certified barrier or a certified isolation amplifier with an intrinsically safe circuit according to the present category has to be connected in series for power limitation.

## Appliance information

### Dimensions

Order code				
Type	NG	G	W	KL
KN - VK 050 IG2	MS	2		
KN - VK 050 IG2	VA	2		

NG = Nominal size

G = Thread

W = Material

KL = Cable length

According to Directive 2014/68/EU for pressure equipment:

Usable for hazardous gases and liquids of group 1 up to 10 bar and up to DN 100

For example in pneumatic conveyor systems with combustible dusts etc.

Result of the evaluation of ignition danger acc. to DIN EN ISO 80079-36:

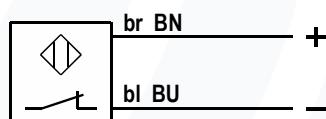

The couplings (without switches) have no potential source of ignition on their own.

007-0213

### Wiring connection

Cable 2 x 0.34 mm<sup>2</sup>

Cable length (KL)  
2 = 2 m  
5 = 5 m  
0 = 10 m

Pepperl+Fuchs NJ4

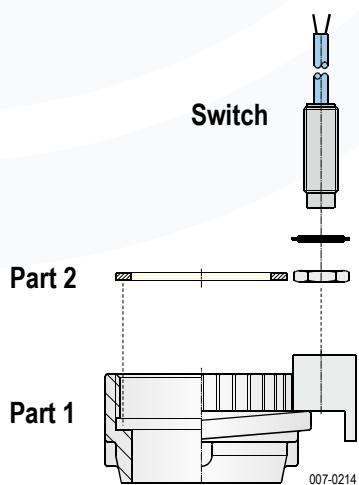

007-AP03

### Technical data

Materials	(W)	MS = Brass VA = 1.4408 / 316
Switch		PBTP (Polybutylenterephthalat)
Mounting position		any
Ambient temperature		-25 °C ... +60 °C
Nominal voltage		8 V DC (R <sub>i</sub> approx. 1 kΩ)
Power consumption		activated: ≤ 1 mA not activated: ≥ 3 mA
Type of protection		IP68/IP65 acc. to DIN EN 60529
Maintenance		none

ATEX-Option Gas and Dust II 2G Ex ia IIC T6...T1 Gb  
II 1D Ex ia IIIC T135°C Da

### Components

Order code switch		
Switch	NG	G
KN - NJ4K - M12 - 2		
KN - NJ4K - M12 - 5		
KN - NJ4K - M12 - 0		

Order code Part 1		
NG	G	W
K - FVK 050	IG2	MS E
K - FVK 050	IG3	VA E

inkl. seal ring

Order code Part 2	
Seal ring	Material
K-TWIG2DRG-PU	Polyurethan, blue
K-TWIG2DRG-PT	PTFE, white

NG = Nominal size

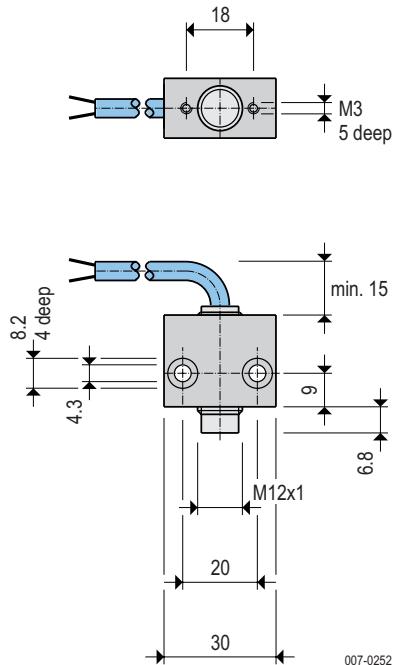

G = Thread

# EU-Konformitätserklärung EU-Declaration of Conformity

Wir/We

**MOLLET Füllstandtechnik GmbH**Industriepark RIO 103  
D-74706 Osterburken  
Tel. 06291 64400 Fax 06291 9846

erklären hiermit, dass die Geräte:

**Schlauch-Kupplungen** mit den elektrischen Betriebsmitteln:  
**Endschalter, Codeträger, Lesekopf, Lesestation, Expanderkarte**  
der Typenreihe:**KE ... , KI ... , KN ... , KL ... , KC ...**auf die sich diese Erklärung bezieht, den folgenden Normen  
oder normativen Dokumenten entsprechen:**Richtlinie 2014/35/EU** (NSR-Richtlinie)  
**Richtlinie 2014/30/EU** (EMV-Richtlinie)

und

**DIN EN 61010-1, DIN EN 60529**  
**DIN EN 61326-1**

Die grundlegenden Sicherheits- und Gesundheitsanforderungen werden erfüllt gemäß den Bestimmungen der Richtlinien und durch Einhaltung der Normen soweit es im Rahmen des Lieferumfangs möglich ist.

declare that the devices:

**Hose couplings** with the electrical equipment:  
**limit switch, code element, data carrier, read head, read station, processor unit, expander card** of type:**KE ... , KI ... , KN ... , KL ... , KC ...**

to which this declaration relates is in accordance with the following standards or other normative documents:

**Directive 2014/35/EU** (Directive LVD)  
**Directive 2014/30/EU** (Directive EMC)

and

**DIN EN 61010-1, DIN EN 60529**  
**DIN EN 61326-1**

The Essential Health and Safety Requirements are assured by compliance with the directive and observance of the normative documents, as far as the scope of delivery allows.
