

## Temperature probe for p-line Web Sensor

code: DST/C

Digital temperature probe with CINCH connector, for p-line Web Sensors P8xx1 is designed to measure temperature of air (°C or °F) in non-aggressive environment.

### Technical data

|                                   |                                     |
|-----------------------------------|-------------------------------------|
| Temperature measuring range       | -30 to +80°C                        |
| Accuracy of Temperature           | ±0.5°C                              |
| Temperature operating range       | -30 to +80°C                        |
| Relative humidity operating range | 0 to 100%RH (not condensing)        |
| IP protection                     | IP20                                |
| Available measured units          | degrees Celsius, degrees Fahrenheit |
| List of supported devices         | P8511, P8541, P8641, P8552, P8652   |
| Supported firmware P8xx1 versions | 4-5-5.0 and later                   |
| Mechanical dimensions             | length 100mm, diameter 14mm         |
| Connector                         | cinch (RCA)                         |
