

## Reflective plate with four glands for radiation shield

code: FP004

Designed for the protection of up to four weather sensors with a diameter of 13 to 18 mm.  
Fits up to most of probes, e.g. Vaisala, Rotronic.

### Technical data

|                                   |                                   |
|-----------------------------------|-----------------------------------|
| GENERAL TECHNICAL DATA            |                                   |
| Temperature operating range       | -40 to +65 °C                     |
| Relative humidity operating range | 0 to 100 %RH                      |
| Storage temperature range         | -40 to +65 °C                     |
| Storage relative humidity range   | 0 to 100 %RH (no condensation)    |
| Dimension                         | 178 mm (diameter), 45 mm (height) |
| Weight                            | approx. 200 g                     |
| Material                          | Stainless steel                   |
| Warranty                          | 3 years                           |
